

Consequences of Sustained Concussions

Chinara Embden

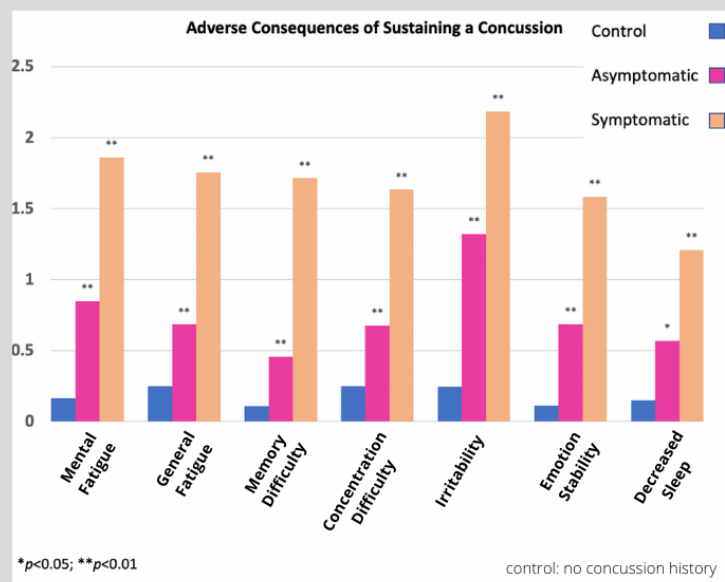

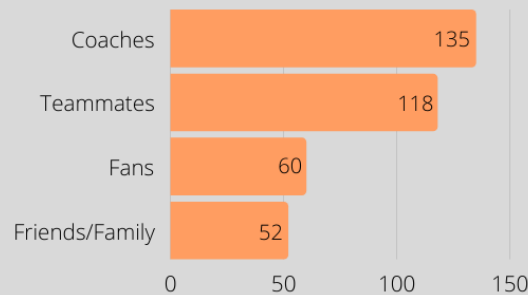

Sample of 741 college student athletes that have suffered from a concussion.

Concussion education and active reporting is important for the longevity of one's health.

Improper treatment and engaging in injury-inducing behavior leads to long term effects.

Students who faced pressure to keep playing after concussion (out of 741)

Even those who didn't show symptoms of sustaining a concussion still showed consequences at a significant level
